1. For the record the Examiner notes that (degree of acidity) mol/liter (found in (C)) corresponds to the normality of the acid.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 to 4 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 99/63022, as interpreted by the English language equivalent Teranishi et al.

Teranishi et al. teach a coating composition. See the teachings on the bottom of column 2 through the top of column 3 which teaches each of component (A) to (D) in amounts which embrace that found in claim 1. See also column 4, lines 25 to 30, which teaches an alcoholic solvent. Particular attention is drawn to Example 5 on Table 1, which teaches a composition containing each of (A) through (E) in amounts as claimed (this composition is prepared in an ethanol solvent). This meets instant claim 1. Col. 9, lines 20 to 25, meets claim 2. The composition of Teranishi et al. forms a water repellent film by treating a substrate with the composition. In this manner claims 1 to 4 are fully met by the teachings in WO 99/63022, as interpreted by Teranishi et al.
